3. What does SKU stand for, and why is it important in merchandising?

Answer:

SKU stands for Stock Keeping Unit. It is a unique identifier assigned to each product variant, including details like size, color, and style. SKUs are vital in merchandising because they help in inventory management, tracking sales performance, and ensuring accurate stock levels, which are essential for maintaining optimal product availability and avoiding stockouts or overstocking.

4. Which of the following strategies is most effective for increasing foot traffic in a retail store?

- a) Offering discounts and promotional sales
- b) Reducing store hours
- c) Limiting product variety
- d) Removing window displays

Answer:

5. How does cross-merchandising benefit retail stores?

Answer:

Cross-merchandising involves placing related products together to encourage additional purchases. For example, displaying batteries near electronic devices or accessories with clothing. This strategy benefits retail stores by increasing average transaction value, promoting complementary products, and enhancing the shopping experience.

6. What is the purpose of a planogram in merchandising?

Answer:

A planogram is a visual representation or diagram that illustrates how products should be displayed on shelves and fixtures. Its purpose is to ensure consistent, attractive, and efficient product placement across stores, thereby maximizing sales, space utilization, and compliance with branding standards.

7. Which factor is most critical when choosing store window displays?

- a) Brightness and lighting
- b) Seasonal relevance and promotion
- c) Store layout complexity
